

Mixed-Valence Compounds: Theory and Applications in Chemistry, Physics, Geology, and Biology (Paperback)

Filesize: 6.35 MB

Reviews

It is one of the best pdf. It is written in straightforward words and never difficult to understand. It has been designed in an extremely straightforward way and it is just following it that I finished reading this book through which basically modified me, affected the way I believe.
(Deonte Abbott III)

MIXED-VALENCE COMPOUNDS: THEORY AND APPLICATIONS IN CHEMISTRY, PHYSICS, GEOLOGY, AND BIOLOGY (PAPERBACK)

Springer, Netherlands, 2011. Paperback. Book Condition: New. 240 x 160 mm. Language: English . Brand New Book ***** Print on Demand *****.It has been a decade since two seminal reviews demonstrated that mixed-valence compounds share many unique and fascinating features. The insight provided by those early works has promoted a great deal of both experimental and theoretical study. As a result of extensive efforts, our understanding of the bonding and properties of mixed-valence compounds has advanced substantially. There has been no comprehensive treatment of mixed-valence compounds since 1967, and the meeting convened at Oxford in September, 1979, provided a unique opportunity to examine the subject and its many ramifications. Mixed-valence compounds play an important role in many fields. Although the major impact of the subject has been in chemistry, its importance has become increasingly clear in solid state physics, geology, and biology. Extensive interest and effort in the field of molecular metals has demonstrated that mixed-valency is a prerequisite for high electrical conductivity. The intense colors of many minerals have been shown to be due to mixed-valency, and the electron-transfer properties of certain mixed-valence metalloproteins are important in biological processes. Experts from all of these areas participated in this meeting, and the truly interdisciplinary nature of the subject made it a unique learning experience for all in attendance. Softcover reprint of the original 1st ed. 1980.
