THIS IS THE FULL-COLOR EDITION QUOTES FROM THOSE WHO KNOW: Even before the advent of biodomes, experimentation had already begun with domed enclosures that could sustain year-round gardens. At the forefront was Patricia Watters, author of the *The Biodome Garden Book*, the premier book on passive-solar biodome greenhouse gardening. (WHOLE LIFE TIMES MAGAZINE) Located in the Brewer Park Community Garden, the biodome garden is a structure of superior strength which can handle harsh weather conditions, including strong winds and snow. The atmosphere within the biodome garden is naturally humidified with a wind-powered ventilation system. In size, it will be 16 (sixteen) feet in diameter and eight (8) feet high. (OTTAWA BIOSPHERE ECO CITY INITIATIVE). May as well start off with the most comprehensive food production system that I have ever come across. A wonderful lady named Patricia Watters has written a book on how to construct a system that not only produces produce, but also fish, (a great protein source) in an environment that does not require sprays or the traditional heating and electrical expenses associated with green house systems.
