Observations made at Yale College, New Haven, and by Nathaniel Goodwin, Esq., of Hartford, agree with those of the late Mr. De Witt. In June, 1805, the writer commenced observing the declination of the magnetic needle, at Hebron, in Connecticut, and he has continued his observations to the present date, June, 1835. The same compass, with the same needle, has been set at the same place, and to the same object. During that period, the north end of the needle declined to the west 1 20 . At the former date, the declination was 4 50 W. The annual motion of the needle has not been uniformly steady. In some years it was more rapid than in others, and, in one or two instances, for a period of three or four years, none, except the diurnal motion,...
