

## Bulletin - Engineering Experiment Station Volume 27-34 (Paperback)

Filesize: 5.43 MB

### ***Reviews***

*It is fantastic and great. It generally is not going to cost an excessive amount of. You will like the way the blogger create this book.*

***(Gerardo Bauch PhD)***

## BULLETIN - ENGINEERING EXPERIMENT STATION VOLUME 27-34 (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909 Excerpt: .not be identical. We proceed, therefore, to correct the constants by the Method of Least Squares. Let  $(t_1, x_1); (t_2, x_2); \dots; (t_n, x_n)$  be observed pairs of values of  $t$  and  $x$ . The problem is then to determine  $a$  and  $y$  in such a way that if  $t$  lies in  $nS^2 = a^2$  (18)  $1$  shall be a minimum. In order that  $a$  and  $y$  shall make a minimum they must satisfy the so-called normal equations:  $i_2$ -pf These equations may be written As their exact solution in their present form is impracticable on account of their complexity we replace them in the usual way by a system of approximately equivalent linear equations, by making use of the fact that the quantities  $u, v$  by which  $a$  and  $y$  differ from  $a_0, y_0$  respectively are small compared with  $a_0, y_0$ . Expanding the logarithms by Maclaurin's series and neglecting terms of the order of  $uv$  and  $v^2$  in comparison with those of the order of  $u$  and  $v$  we have (23) Expressing the natural logarithms in terms of common logarithms we have, putting  $u = B_i A_i + v = B_i V_i$ , (25)  $I$  or in the usual notation of the method of least squares  $u A A + v A B = K A G$ , (20)  $u B A + v B B = K B C$ . From these equations  $u$  and  $v$  are readily computed and hence the corrected values  $y = a_0 + u$  (2D)  $y = a_0 + v$  are found. 6. Application Of The Method...
